

Be Smooth! Feel Beautiful!

Celebrating 20 Years!

Do you feel that excess facial or body hair is making you self-conscious or embarrassed?

Well, there is a way to get the hair-free look you deserve. Permanent hair removal can reveal the full extent of your natural health and Ann Marie can help you to become more confident and regain self-esteem. You will love the smooth, healthy look you can achieve with electrolysis.

AMP ELECTROLYSIS is dedicated to helping you maintain the smooth-skinned, perfectly groomed look you deserve. When you look your best, you feel the best. With professional electrolysis treatments, you can take control of unwanted hair and let your beautiful skin shine through.

Ann Marie Preston, owner of AMP ELECTROLYSIS, opened her practice in 1995. Her passion for performing electrolysis has been there since the day she started and she absolutely loves having a client leave with clean, smooth, hair free skin. Not being a stranger to electrolysis, here are some common questions that Ann Marie receives at the time of a consult.

How many treatments does it take to remove a hair or how many are required?

It is almost impossible to determine the exact number of treatments required for any given area. There are so many factors that are involved when determining why you have unwanted hair in the first place. You should never be told a specific number of treatments only an estimated amount of time. The amount of treatments always depends on the client sticking to his/her treatments, and never, ever tweezing. You can cut or shave, and don't be in a rush. Don't get "hairsterical". Have patience, it's well worth it!

Does electrolysis hurt?

Each client is different and some are more sensitive than others. Even so, the most sensitive can tolerate the treatments.

Does it work?

Absolutely! Results are in effect immediately. There is a lot of hair removal information on electrolysis that is misleading. Just listen to your electrologist, and follow your treatment plan.

ELECTROLYSIS-the only method approved by the FDA for permanent hair removal! Remember, hair grows in different stages: growing, resting and shedding. Therefore, keep up with your treatment plan because all of the hair is not in the same stage at any given time! You will not be disappointed!

Ann Marie Preston, LE, CPE, Owner of AMP Electrolysis (center) celebrates her 20th anniversary with the Mayor of Oceanport and members of the borough council. Pictured (left-right) are: Councilman Irace, Mayor Mahon, Councilwoman Kahle, Councilman Paglia. Ann Marie started her practice in 1995 and absolutely adores her job. She is very compassionate towards her clients and has had the experience of electrolysis herself, therefore

knows the feeling of wanting to get rid of unwanted hair.

She is a licensed and certified professional electrologist, as well as a member of the American Electrology Association, and the Electrologists Association of New Jersey.

Testimonials:

Anne Marie is fantastic! Professional, reliable, always on time and really knows what she is doing. I had facial hair that was out of control, but I've been going to AMP Electrolysis for over a year and have gotten the results I was looking for. It's a commitment that has been well worth fitting into my busy schedule, my skin is so smooth now! Anne Marie makes you feel very comfortable, and has a true attention to detail. Highly recommend! - Elise

I'm so glad that I chose AMP Electrolysis! You could not ask for a nicer, more understanding, person; a true professional. Ms. Preston's office is clean, private, and convenient! I highly recommend AMP! - Colleen
